EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Douglas Rupert on April 4, 2005.

The application has been amended as follows:

Claim 38 (currently amended). A link as claimed in claim 37, wherein the initial approximator comprises a static pre-distortion approximation model.

Claim 45 (currently amended) A link as claimed in claim 44, wherein the feedback control loop includes a receiver to receive signals transmitted by a satellite, a constellation analyzer to generate error signals produced by the receiver, in which error signals are representative of a displacement of constellation points in the signal, the constellation analyzer to provide output to a processor to produce non-linear characteristics as an input to said apparatus.

EXAMINER'S STATEMENTS OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Claims 26-45 which have been renumbered claims 1-20 are allowable over prior art because related references do not disclose a pre-distortion apparatus including a cascade of identical pre-distorting stages, each of which generates an approximation of the required pre-distortion, each successive stage receiving the approximation from the preceding stage in an iterative fashion so that errors in successive approximations converge toward zero with increase in the number of stages.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Curtis B. Odom whose telephone number is 571-272-3046. The examiner can normally be reached on Monday- Friday, 8-5.
